## From Start Up to Success Road Map For High Availability and Scalability Hosting Infrastructure

## About Silicon House

Silicon House is one of the largest **Managed Servers, Cloud Servers and Reseller Hosting** provider for more than **Two Decades** in India. Silicon House is highly specialized Cloud Computing and Fully Managed Server provider in India. Operating a **Fully Automated Virtual Data Center** for more than a decade, we have been able to leverage our immense experience and cutting edge technology to provide a practical and working solution for thousands of customers in more than 90+ countries.

Hot Start ups to Blue chip companies in India and around the world are powered by Silicon House's State Of The Art Infrastructure. Many successful start ups have grown multi-fold into large enterprises with our cutting edge infrastructure and innovative solutions.

### Business Focus

Silicon House is a complete solution provider for managed dedicated servers, cloud servers and reseller hosting. Our expertise is in implementing high availability, high performance and hybrid cloud / dedicated servers. The solutions that we offer are Fully Managed and hence we take care of the server side infrastructure while you can concentrate on your core businesses.

### Innovate & Expertise

Every problem presented to us like mail tracking or archiving, multi-location cloud load balancing, biz intel reporting, state of the art intrusion detection, has been converted into an opportunity to innovate new solutions. With over Two Decades of experience and expertise, we convert these innovations into working solutions and keep building expertise in them. Our innovative development has resulted in products and services such as *XMAIL Trac, Super Reseller Suite, Arrow Shield, Arrow Streaming Servers, Arrow App Sync, Arrow DB Sync, Arrow Global Load Balancer, Arrow Tomcat, Biz Intel Reporting, Arrow Local RC etc.*

### Adapt & Grow

In an industry like internet where technology changes literally every day, being flexible to accommodate new technologies, getting

expertise in cutting edge technologies requires a culture that is deep rooted for knowledge than anything else. This is the very essence of how we build our solutions. Our solutions are always framework based so that any future disruptive technology can be accommodated with ease. We work closely with our customers. That enables us to share a wealth of knowledge about server side issues to our customers and gain as much about application they build.

Silicon House runs hundreds of servers serving customers in more than 90+ countries.

1. We handle more than 55 million emails per day
2. Our Fully Automated Virtual Data Center network spans over three continents, four countries
3. Our servers power more than 750,000+ websites
4. We are pioneers in building Fully Automated Virtual Data Centers integrated with multi-location clouds
5. Innovation is our base and we consistently do that
6. NIXI ranks us as a Top Performing Registrar
